network *visualization*

introduction to *network analysis* (*ina*)

Lovro Šubelj
University of Ljubljana
spring 2022/23

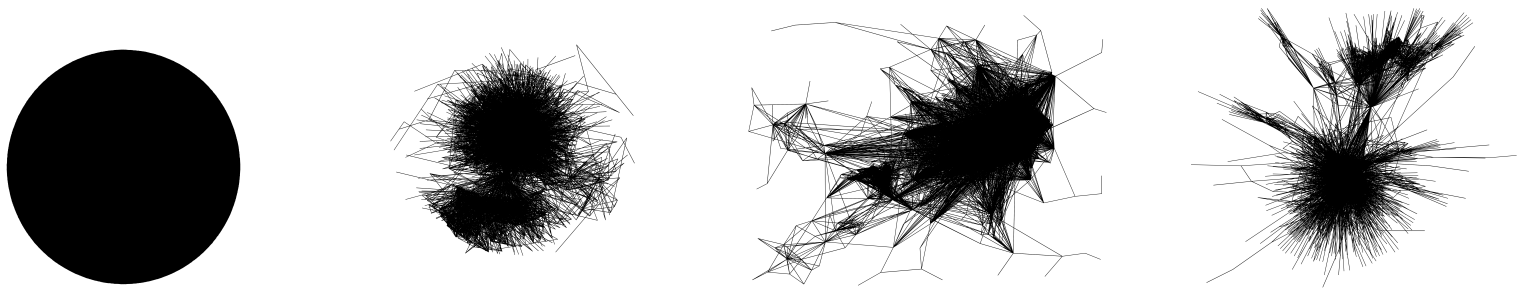
visualization *overview*

network *visualization* with *wiring diagram**

1st compute *network layout* as *coordinates* in Euclidean plane etc.

2nd *representation* of *network links*? strength, pattern, shape, color etc.

3rd *representation* of *network nodes*? size, shape, color, label etc.

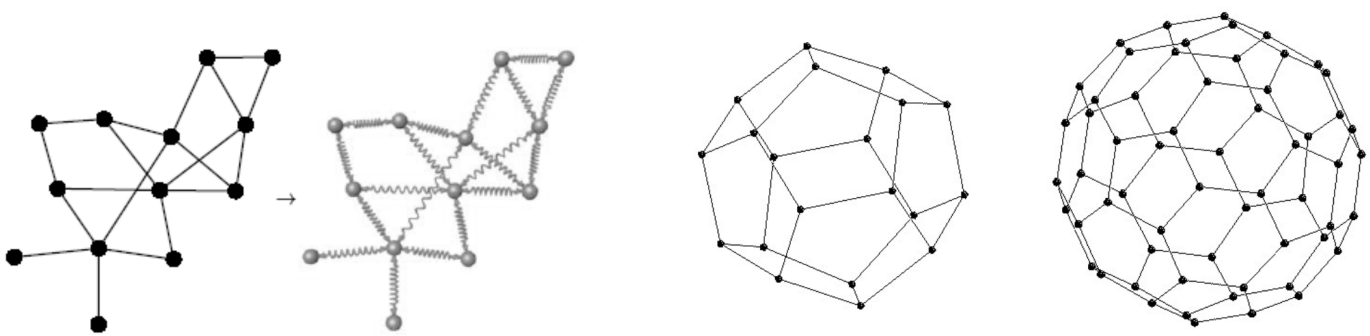


similar link lengths, no crossings, displays symmetry, even node distribution etc.

*small/dense graphs better visualized with block models

visualization *Eades*

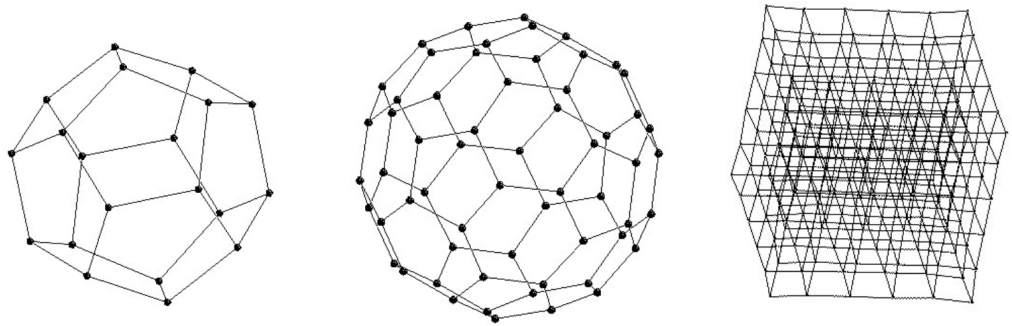
- Eades *spring embedded layout* [Ead84]
- move nodes thus to *minimize layout energy*
- *repulsive force* between *nodes* i and j is $\propto -c_1/l_{ij}^2$
- *attractive force* between *neighbors* i and j is $\propto \log l_{ij}/c_2$
  - l_{ij} is *Euclidean distance* between *nodes* i and j
  - c_1 and c_2 are some *appropriate constants*



aesthetically pleasing with similar link lengths & symmetry

visualization *Fruchterman-Reingold*

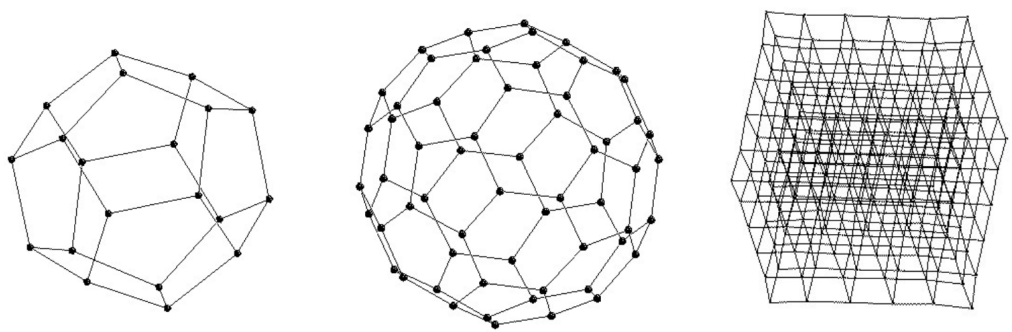
- Fruchterman-Reingold *force-directed layout* [FR91]
- move nodes thus to *minimize layout energy* as before
- *repulsive force* between *nodes* i and j is $\propto -c^2/l_{ij}$
- *attractive force* between *neighbors* i and j is $\propto l_{ij}^2/c$
  - l_{ij} is *Euclidean distance* between *nodes* i and j
  - c is *appropriate constant* set to $\propto \sqrt{area/n}$



pleasing with similar link lengths, symmetry & even distribution

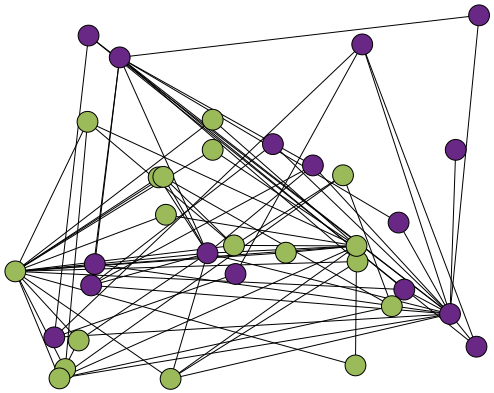
visualization *Kamada-Kawai*

- Kamada-Kawai *graph theoretic layout* [KK89]
- move nodes thus to *minimize layout energy* $l_{ij} \propto d_{ij}$
- *attractive/repulsive force* between *nodes* i and j is $\propto 1/d_{ij}^2$
  - l_{ij} is *layout Euclidean distance* between *nodes* i and j
  - d_{ij} is *graph geodesic distance* between *nodes* i and j

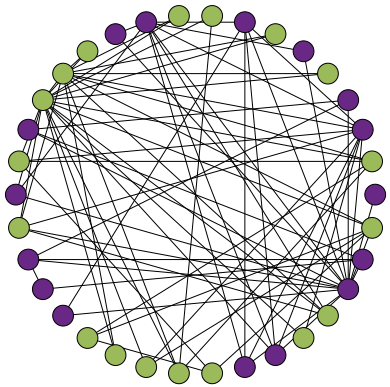


desired layout distance between nodes is their graph distance

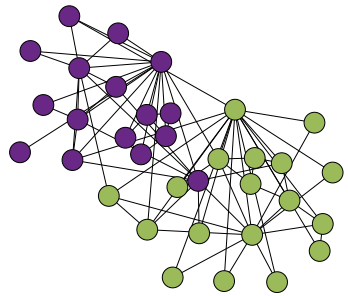
visualization *karate*



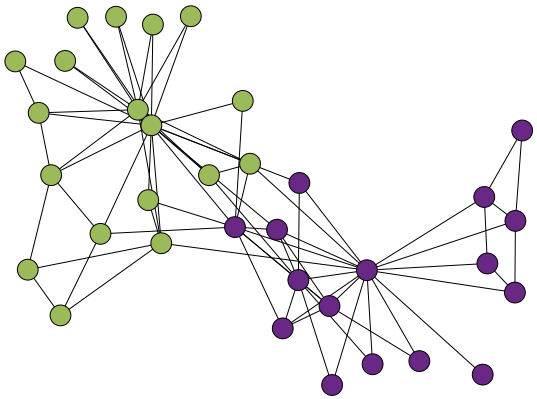
random layout



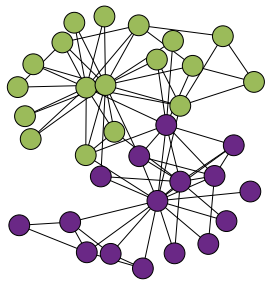
circular layout



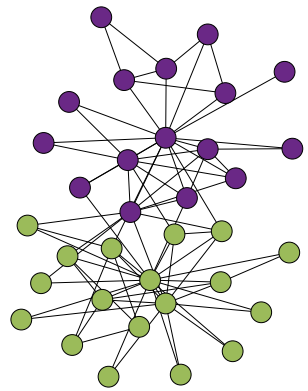
spring embedding layout [Ead84]



Fruchterman-Reingold layout [FR91]

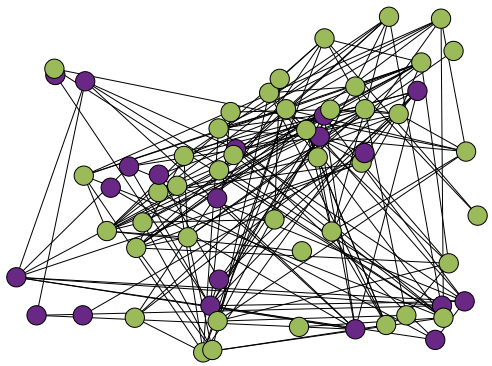


Kamada-Kawai layout [KK89]

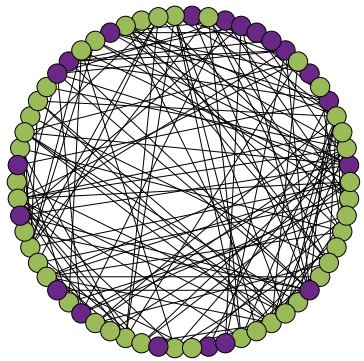


LGL layout [ADWM04]

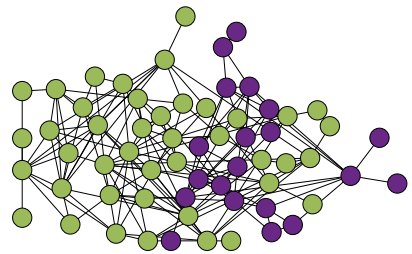
visualization *dolphins*



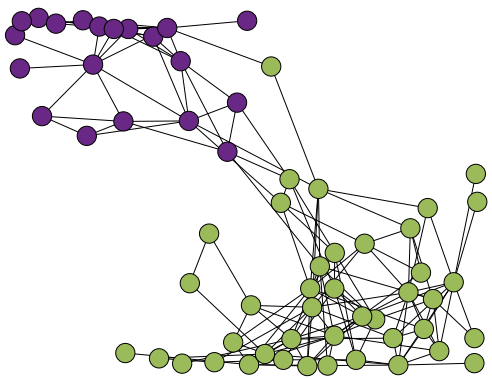
random layout



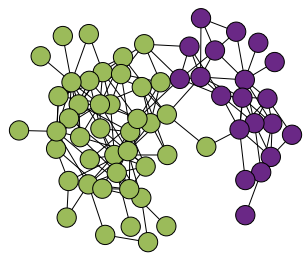
circular layout



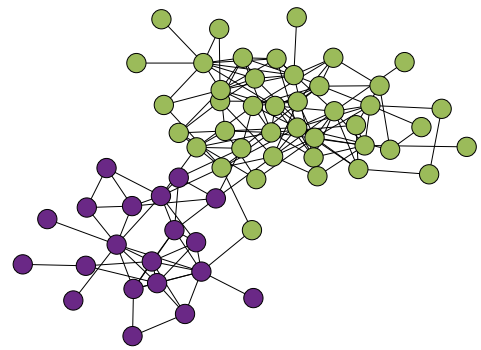
spring embedding layout [Ead84]



Fruchterman-Reingold layout [FR91]

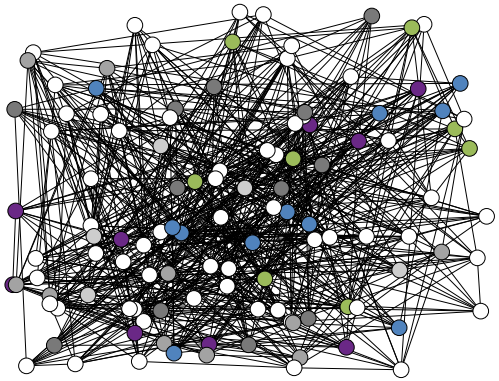


Kamada-Kawai layout [KK89]

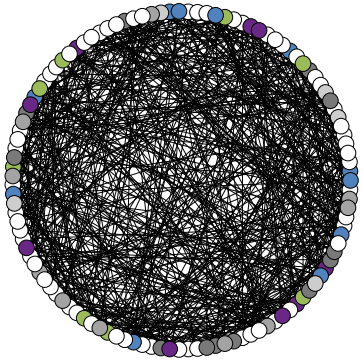


LGL layout [ADWM04]

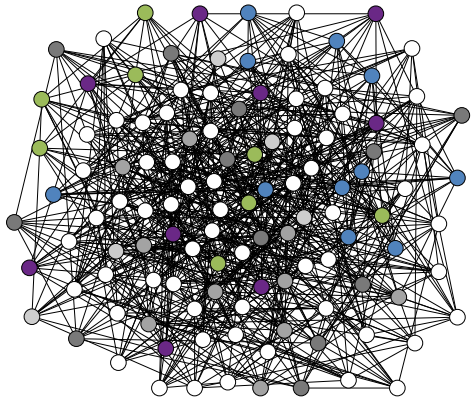
visualization *football*



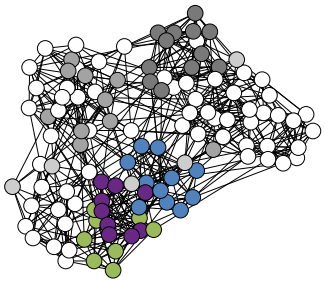
random layout



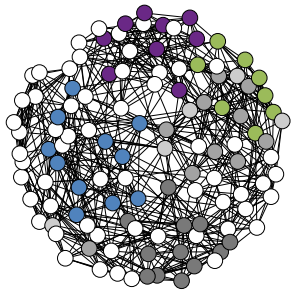
circular layout



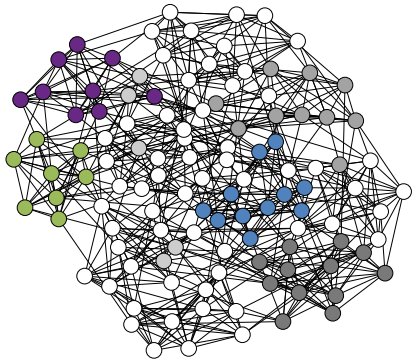
spring embedding layout [Ead84]



Fruchterman-Reingold layout [FR91]

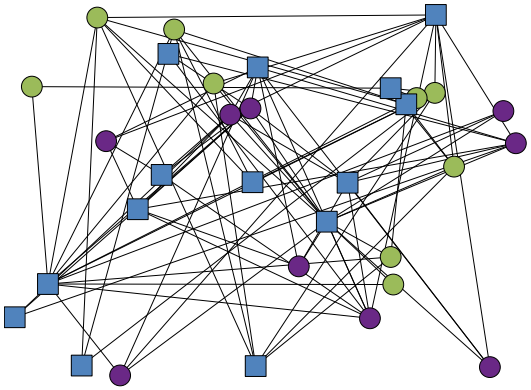


Kamada-Kawai layout [KK89]

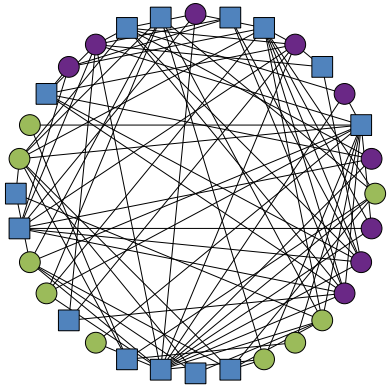


LGL layout [ADWM04]

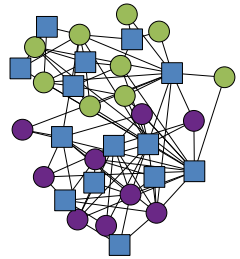
visualization *women*



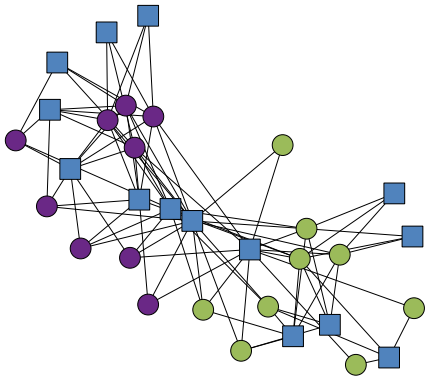
random layout



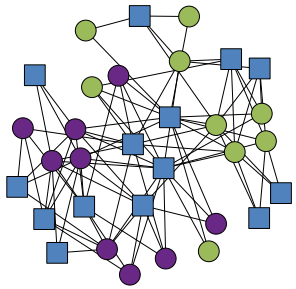
circular layout



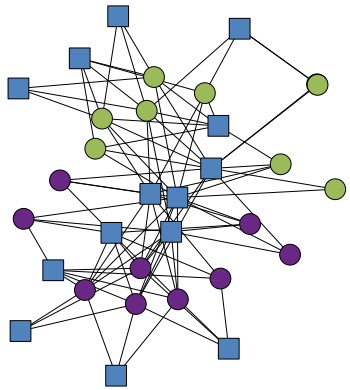
spring embedding layout [Ead84]



Fruchterman-Reingold layout [FR91]

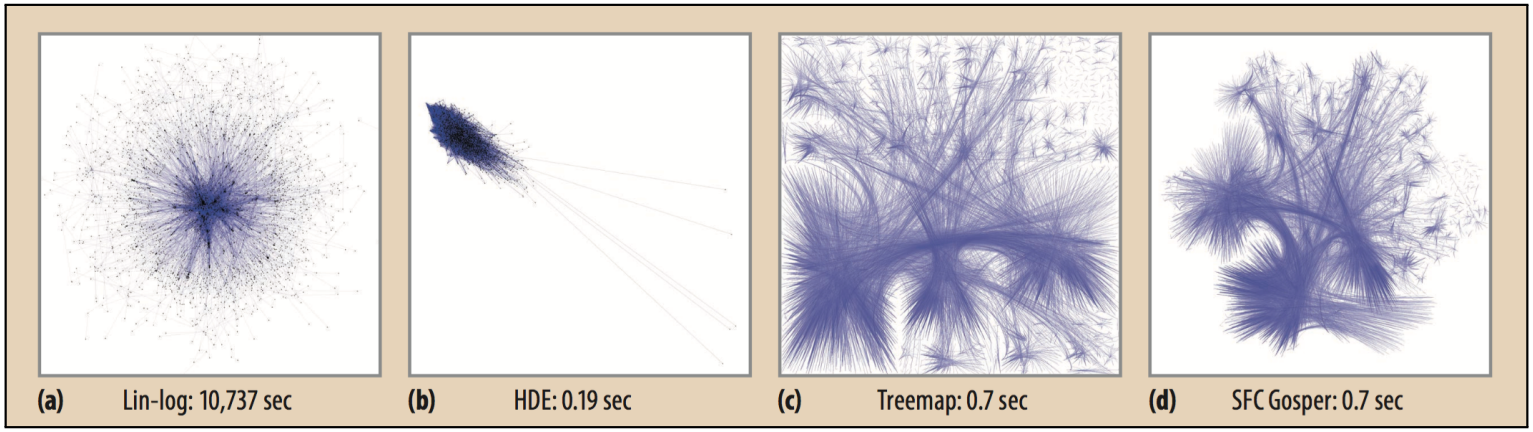


Kamada-Kawai layout [KK89]

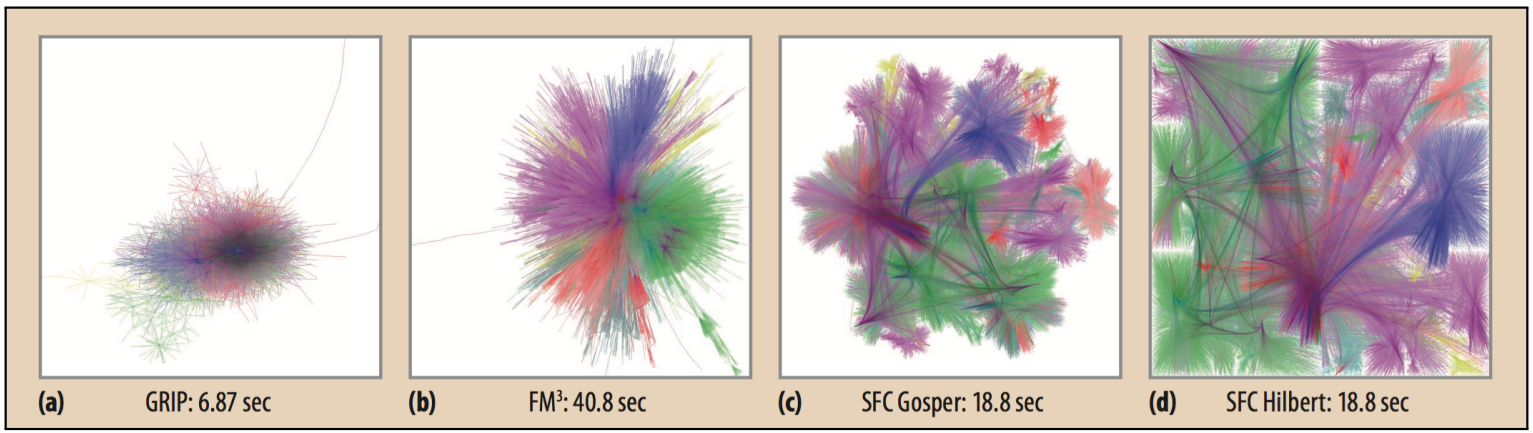


LGL layout [ADWM04]

visualization *static*

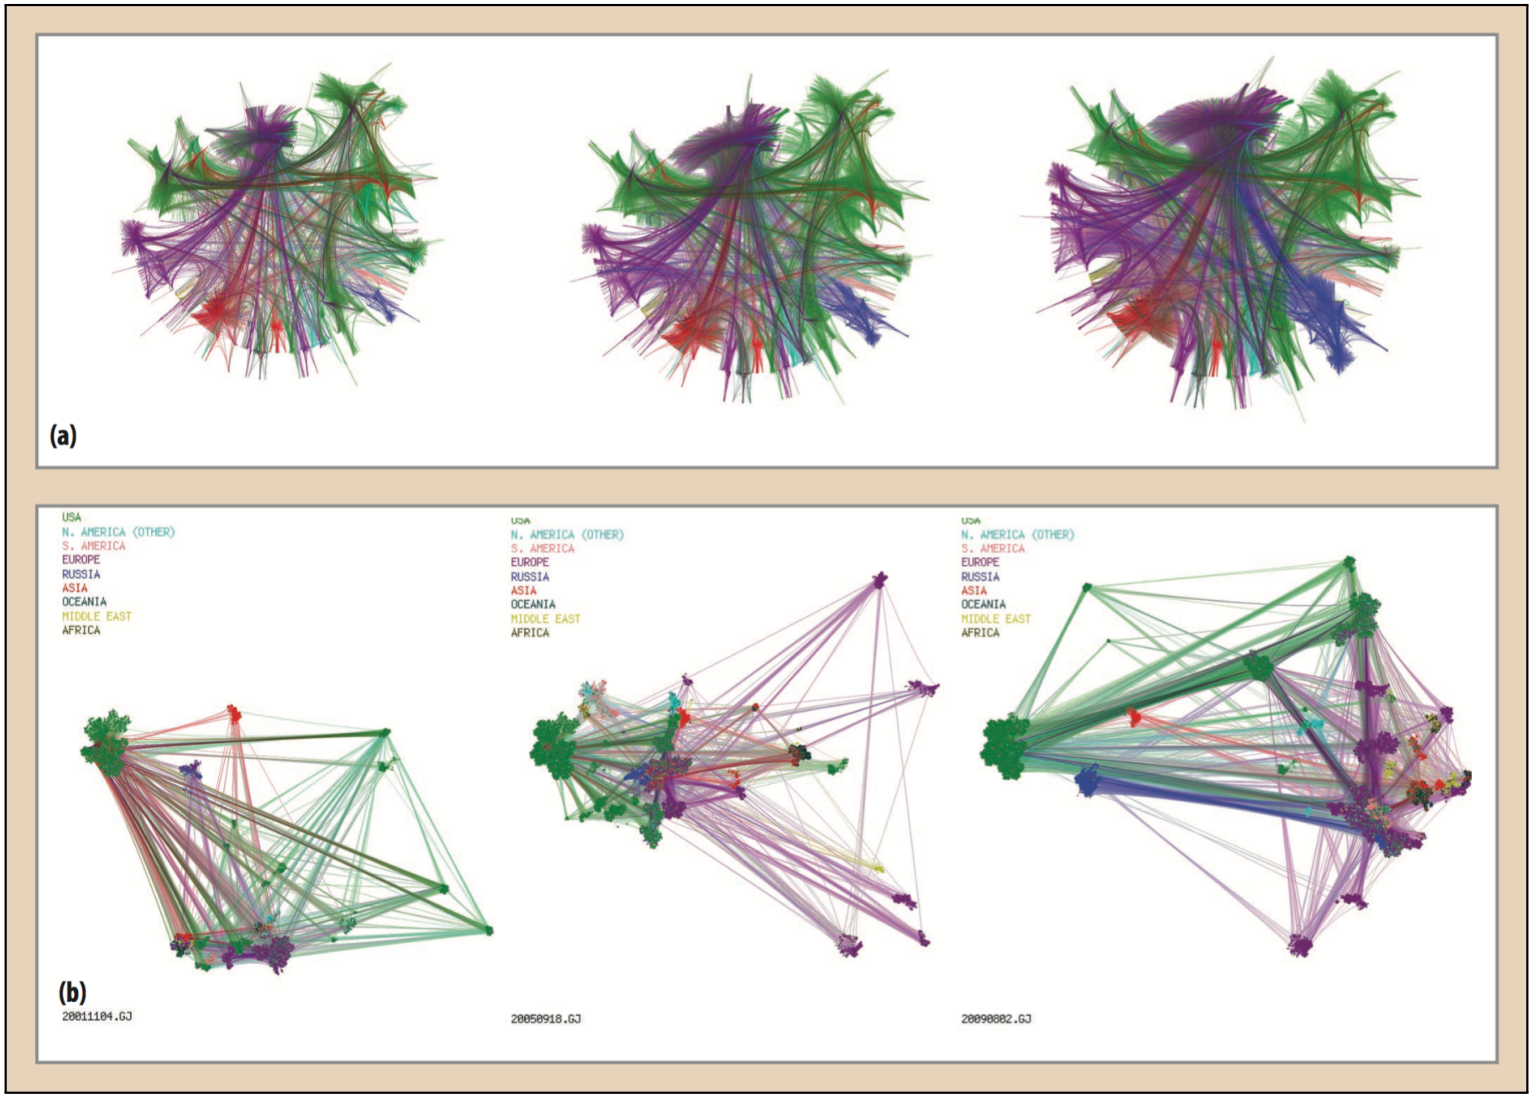


(*a*) *traditional* (*b*) *algebraic* (*c*) *hierarchical* and (*d*) *clustering-based force-directed layouts* of web graph



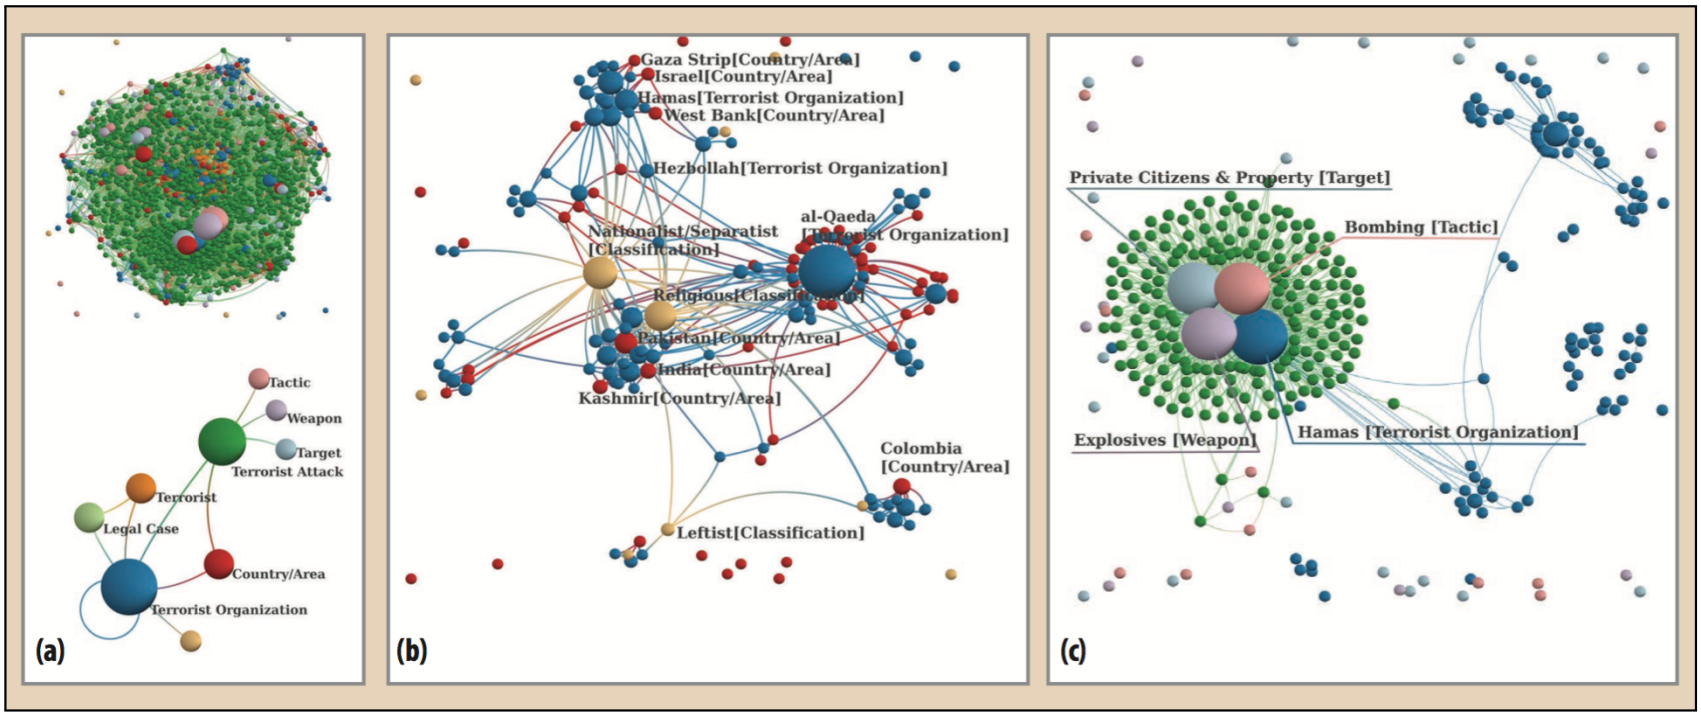
(*a*,*b*) *multilevel* and (*c*,*d*) *clustering-based force-directed layouts* of autonomous systems by continent

visualization *dynamic*



(*a*) *incremental* and (*b*) *global* clustering-based *force-directed layouts* of Internet by continent

visualization *heterogeneous*



terrorist network (*a*) *force-directed layout* with *semantic ontology* and (*b*) *active organizations* (*c*) *attack behaviour*
